SUMMARY

Full Stack Developer with professional experience building enterprise web applications using Next.js, React, TypeScript, Node.js, Prisma, PostgreSQL, and AWS. Experienced in developing frontend and backend solutions, REST APIs, authentication, database functionality, and cloud deployments. Led the planning and development of an enterprise media intelligence platform, working with business stakeholders to define requirements, prioritise features, and coordinate project delivery.

WORK EXPERIENCE

Full Stack Developer **December 2025 - Present**
EBH IT Solutions | Seri Kembangan, Selangor

- **Developed and maintained** enterprise web applications using Next.js, React, TypeScript, Node.js, Prisma ORM, and PostgreSQL.
- Developed and integrated **frontend and backend functionality**, including REST APIs, authentication, role-based access control, and **database schemas, queries**, and migrations using Prisma and PostgreSQL.
- **Led the planning and development of an enterprise media intelligence project**, coordinating feature priorities, development tasks, and project delivery.
- Worked with **business stakeholders** to understand requirements, refine priorities, and translate business needs into technical solutions.
- Managed **AWS deployments and cloud infrastructure** using Amplify, EC2, Elastic Beanstalk, S3, Cognito, and Cloudflare, while performing deployment verification and production troubleshooting.
- Managed code reviews, **bug fixes, technical documentation, and development tasks**, while supervising and mentoring **3 software development interns**.

Frontend Developer Intern **March 2024 - July 2024**
Al-Ain IT Consultants Sdn Bhd | Bukit Jalil, Selangor

- Developed a **cloud-based software testing platform** using Next.js, TypeScript, and React, including responsive user profile and account management features.
- Collaborated with developers to diagnose and resolve **30+ frontend issues**, contributing to a **25% improvement in testing reliability**.
- Monitored the production website and created **10–15 detailed issue tickets** in Taiga to support timely resolution by the development team.

Frontend Developer Intern **September 2021- February 2022**
Hezmedia Interactive Sdn Bhd | Petaling Jaya, Selangor

- Developed a responsive **WordPress landing page for a mobile application** and a **FlutterFlow facility management application** integrated with Firebase, supporting **100+ daily field records**.
- Conducted functional testing by identifying and reporting **30+ UI and functional defects**, improving application stability and user experience.

EDUCATION

Bachelor of Computer Science (Hons.) – Netcentric Computing **2022 - 2024**
Universiti Teknologi MARA (UiTM), Shah Alam | CGPA: 3.53

Diploma in Computer Science **2019 - 2022**
Universiti Teknologi MARA (UiTM), Kuala Terengganu | CGPA: 3.71

PROJECTS

Media Command Centre (MCC) – Enterprise Media Intelligence Platform

Project Manager / Full Stack Developer

- Led the planning and development of an enterprise media intelligence platform covering media monitoring, analytics, social listening, keyword monitoring, and reporting.
- Developed and integrated frontend and backend functionality across dashboard, article, analytics, social listening, journalist, and administration modules using Next.js, TypeScript, Node.js, Prisma, and PostgreSQL.
- Developed REST APIs, database schemas and queries, authentication, and RBAC, including administrative and multi-tenant management functionality.
- Contributed to AI-powered analysis and reporting by refining prompts, implementing AI integration logic, troubleshooting inaccurate results, and integrating generated content into report layouts.
- Developed and adapted social listening scraping functionality using Apify to collect social media posts and comments, while working with business stakeholders on requirements, feature customisation, and AWS deployments.

ePIBG – Digital School & PIBG Management Platform | Full Stack Developer

- Developed the initial frontend UI and workflows across dashboards and role-specific modules, contributing to 5–20 pages and their connected workflows.
- Established the initial mobile application UI for multiple user roles as part of the platform's early development.
- Integrated backend APIs with frontend pages and workflows, connecting application functions to user-facing features and supporting end-to-end functionality.
- Contributed to the Digital Consent module by defining its initial workflow, creating the required Prisma schema, developing supporting backend functions and APIs, and integrating them with the frontend; also performed functional workflow testing.

Equip&Go – Outdoor Equipment Rental System | Final Year Project

- Developed a Flutter/Dart mobile application for browsing, managing, and booking outdoor equipment rentals, designing the UI and user workflows independently with Figma.
- Implemented Firebase Authentication and Cloud Firestore for user accounts and application data, including equipment/store management, booking workflows, availability handling, and multi-role functionality.
- Integrated the Google Maps API to display user and rental-store locations, and implemented the core rental workflow from equipment discovery and selection through booking and payment prototype.

SKILLS

- Frontend: Next.js, React.js, TypeScript, JavaScript, Tailwind CSS
- Backend: Node.js, Express.js, REST APIs, Prisma ORM, Laravel, PHP
- Database: PostgreSQL, MySQL, MongoDB, Firebase
- Cloud & DevOps: AWS Amplify, EC2, Elastic Beanstalk, S3, Cognito, Cloudflare, Git, GitHub
- Mobile: Flutter, Dart, FlutterFlow
- Tools & Services: Postman, Apify, Puppeteer, Figma, Taiga

LANGUAGES

- Malay : Native
- English : Fluent
