SUMMARY

Full Stack Developer with professional experience developing enterprise web applications using Next.js, React, Node.js, TypeScript, and PostgreSQL. Experienced in delivering scalable frontend and backend solutions, collaborating with cross-functional teams, and translating business requirements into production-ready features. Passionate about building reliable software and continuously expanding expertise in modern web technologies.

WORK EXPERIENCE

Full Stack Developer **December 2025 - Present**
EBH IT Solutions | Seri Kembangan, Selangor

- Developed and maintained enterprise web applications using Next.js, React, TypeScript, Node.js, Prisma ORM, and PostgreSQL.
- Worked with the CTO and prospective clients to refine requirements and feature priorities.
- Managed deployments and cloud infrastructure using AWS Amplify, EC2, Elastic Beanstalk, S3, Cognito, and Cloudflare.
- Managed feature development, code reviews, bug fixes, deployment verification, and technical documentation throughout the software development lifecycle.
- Supervised and mentored three software development interns by assigning tasks, reviewing progress, and providing technical guidance.

Frontend Developer Intern **March 2024 - July 2024**
Al-Ain IT Consultants Sdn Bhd | Bukit Jalil, Selangor

- Developed a cloud-based software testing platform using Next.js, TypeScript, and React, enabling smooth test execution and real-time monitoring.
- Developed responsive user profile and account management pages using React and Next.js as part of the core frontend team.
- Integrated GitHub workflows and managed tasks using Taiga, collaborating with developers to debug and resolve 30+ page-specific issues, improving testing reliability by 25%.
- Monitored the production website and created 10–15 detailed issue tickets in Taiga, ensuring timely resolution by the development team.

Frontend Developer Intern **September 2021- February 2022**
Hezmedia Interactive Sdn Bhd | Petaling Jaya, Selangor

- Developed a responsive WordPress landing page for a mobile application and a FlutterFlow facility management application integrated with Firebase, supporting 100+ daily field records.
- Conducted functional testing by identifying and reporting 30+ UI and functional defects, improving application stability and user experience.

EDUCATION

Bachelor of Computer Science (Hons.) – Netcentric Computing **2024**
Universiti Teknologi MARA (UiTM), Shah Alam | CGPA: 3.53

Diploma in Computer Science **2022**
Universiti Teknologi MARA (UiTM), Kuala Terengganu | CGPA: 3.71

PROJECTS

Media Command Centre (MCC) – Enterprise Media Intelligence Platform

Role: **Project Manager**

- Led the planning and development of an enterprise media intelligence platform for monitoring, analysing, and reporting news coverage across multiple media sources.
- Managed project planning, feature prioritisation, and task allocation while mentoring frontend and backend interns throughout the development lifecycle.
- Designed Prisma database schemas, developed backend services, implemented authentication and RBAC, and integrated frontend and backend modules using REST APIs.
- Collaborated with the CTO and prospective clients to refine business requirements while overseeing deployments and cloud infrastructure using AWS Amplify, EC2, Elastic Beanstalk, S3, Cognito, and Cloudflare.

ePIBG – Digital School & PIBG Management Platform

- Contributed to a digital school management platform covering parent engagement, administration, attendance, payments, and school activities.
- Led the development of the Digital Consent module, enabling parents to approve school activities with separate workflows for paid and non-paid events.
- Developed the Treasurer module and integrated frontend components with backend REST APIs while implementing role-based user experiences.
- Performed functional testing, code reviews, and deployment verification through AWS Amplify, resolving workflow, payment, and permission-related issues.

Cloud-based Software Testing Platform

- Developed a cloud-based platform for managing software testing requests and monitoring testing progress.
- Built responsive profile management features using Tailwind CSS, Zod, Zustand, and Prisma.
- Resolved 30+ frontend issues, improving application reliability by 25%.

Outdoor Activities Equipment Rental System - Equip&Go (Final Year Project)

- Developed a mobile application for discovering, booking, and managing location-based outdoor equipment rentals.
- Implemented multi-role access, authentication, booking workflows, and administrative management.
- Integrated Google Maps, Firebase, and push notifications for location and booking features.
