SUMMARY

Computer Science graduate with a strong foundation in Networking and Cybersecurity, and hands-on experience in mobile and web application development using Flutter, Dart, and modern JavaScript frameworks. Passionate about building real-world solutions and contributing to collaborative, tech-driven environments. Actively seeking an entry-level role to apply skills in full-stack development, cloud services, and secure system design.

WORK EXPERIENCE

Frontend Developer Intern

Al-Ain IT Consultants Sdn Bhd | Bukit Jalil, Selangor

July 2024

- Developed a cloud-based software testing platform using Next.js, TypeScript, and React, enabling smooth test execution and real-time monitoring.
- Designed and developed the user profile and edit profile pages, contributing to layout structure, responsive design, and component integration as part of the core frontend team.
- Integrated GitHub workflows and managed tasks using Taiga, collaborating with developers to debug and resolve 30+ page-specific issues, improving testing reliability by 25%.
- Monitored the production website and created 10–15 detailed issue tickets in Taiga, ensuring timely resolution by the development team.

Frontend Developer Intern

Hezmedia Interactive Sdn Bhd | Petaling Jaya, Selangor

February 2022

- Built a responsive WordPress-based landing page for a mobile app product, designed to drive user engagement and support early product exposure.
- Built a facility management mobile application using FlutterFlow and Firebase, enabling real-time data capture for 100+ daily field records.
- Participated in QA testing, identifying and reporting 30+ functional bugs and UI issues to enhance app stability and user experience.

EDUCATION

Universiti Teknologi MARA (UiTM), Shah Alam, Selangor

2024

Bachelor of Computer Science (Hons.) Netcentric Computing, CGPA 3.53

- Related Coursework: Web Application Development, Mobile Application Development, Cloud Computing, Network Programming, Web-Based Systems, Cybersecurity Principles, Network Analysis & Design, Digital Forensics

Universiti Teknologi MARA (UiTM), Kuala Terengganu, Terengganu

2022

Diploma in Computer Science, CGPA 3.71

- Related Coursework: Fundamentals of Programming, Web Design & Development, Multimedia & Animation Techniques, Introduction to Software Development

EXTRACURRICULAR ACTIVITIES

Secretary, Netcentric Computing Club (NETCOM)

Oct 2022 - March 2024

- Organized 45 UiTM student participation in Persidangan PEDi Madani 2023, helping them gain exposure to the digital economy and entrepreneurship.
- Led impactful initiatives, including “1 Hari 1 Ilmu” during Ramadan to promote daily academic and spiritual enrichment, and improved club operations by streamlining documentation processes and Google Drive access.
- Prepared and managed official documents such as proposals, meeting minutes, and financial reports, resulting in a 35% increase in coordination efficiency and 30% faster report turnaround.

President, English Language and Literature Society (ELLITS)

Oct 2020 - Jan 2022

- Led the executive committee in planning club initiatives, reviewing program proposals, and aligning activities with target student interests, resulting in increased campus engagement and club visibility.
- Organized key events such as Spontaneous Storytelling and Sharing Session with ELLITS, enhancing members' public speaking confidence and boosting club productivity by 30%.
- Co-managed a virtual cultural exchange with the Japanese Language Club, guiding students in presenting iconic landmarks of Japan to strengthen their narration and communication skills.

PROJECTS

Cloud-based Software Testing Platform

2024

- Developed a cloud-based software testing platform using Next.js, TypeScript, and React, enabling users to request and manage software testing tasks (gigs) with real-time monitoring, improving test management efficiency for the internal QA workflow.
- Designed and implemented fully responsive user profile and edit profile pages using Tailwind CSS, Flowbite-React, and DaisyUI, integrating data flow with Zod, Zustand, and Prisma for secure form handling and database interaction.
- Monitored production environment and collaborated with QA testers, resolving 30+ frontend UI and logic issues through issue tickets in Taiga, improving reliability and interface clarity by 25%.

Outdoor Activities Equipment Rental System

2023

- Developed a mobile-based Outdoor Activities Equipment Rental System called Equip&Go using Flutter, Firebase, and the Google Maps API, designed to help users search, filter, and rent sports equipment based on location and availability. The app supports multi-role access (user, vendor, admin), integrates real-time push notifications, secure login, booking and return flows, and features an admin panel for managing reports and accounts. The system offers a scalable and efficient solution for equipment rental through a location-based, user-friendly mobile interface.

SKILLS

Framework and Tools: C++, Java, JavaScript, PHP, Dart, ReactJS, React Native, Node.js, Laravel, Flutter, MySQL, MongoDB, Firebase, RESTful API Design, Prisma, GitHub, Figma.

Languages: Malay (Native), English (Fluent)
